

INDUSTRIES, INC.

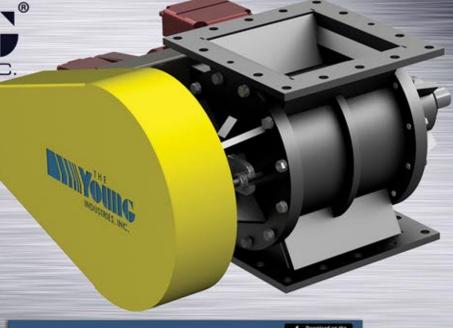

# MODELLH ROTARY VALVE

WWW.YOUNGINDS.COM

## **STANDARD FEATURES:**

- Heavy duty construction with 15 PSIG internal and differential pressure rating.
- Cast or fabricated construction of iron, carbon steel, or 300 series stainless steel.
- Standard design/operating temperature up to 250°F.
- Round or square inlet and discharge flanges.
- Outboard-mounted precision ball bearings.
- Packing gland provides a tight rotor shaft seal with four rings of PTFE impregnated Kevlar.
- Open or shrouded rotors.
- End plates are piloted to assure concentricity of the housing so that tight internal clearances between rotor and housing is provided.

Now Available Rotary Valve Calculator App

## **ENGINEERED TO INCREASE PRODUCTIVITY. BUILT TO LAST.**

The Young Industries, Inc. Model "LH" (Low Headroom) Rotary Valve is a drop-thru design normally used in applications to handle relatively free flowing powders or granules. These rotary valves have been proven to provide superior performance and reliability in a wide range of bulk materials handling applications. The over-all cost of ownership is very low while the service life of the valve is long.

The Model "LH" Rotary Valve features transitioned inlet and discharge throats for those applications where minimizing height is required. This design utilizes smaller diameter rotors and has a lower profile than most other valves.

The rotor is engineered with eight vanes to insure there is always two blades positioned between the inlet and discharge. This two-blade seal and precision machined housing ensures that there is minimum air or gas leakage in those applications where the valve is used to seal between two different pressure or vacuum zones.

The Model "LH" Rotary Valve is recommended for applications with low headroom requirements or when the valve is sized based on matching flange sizing and throughput capacity is not a concern.

226-100.00

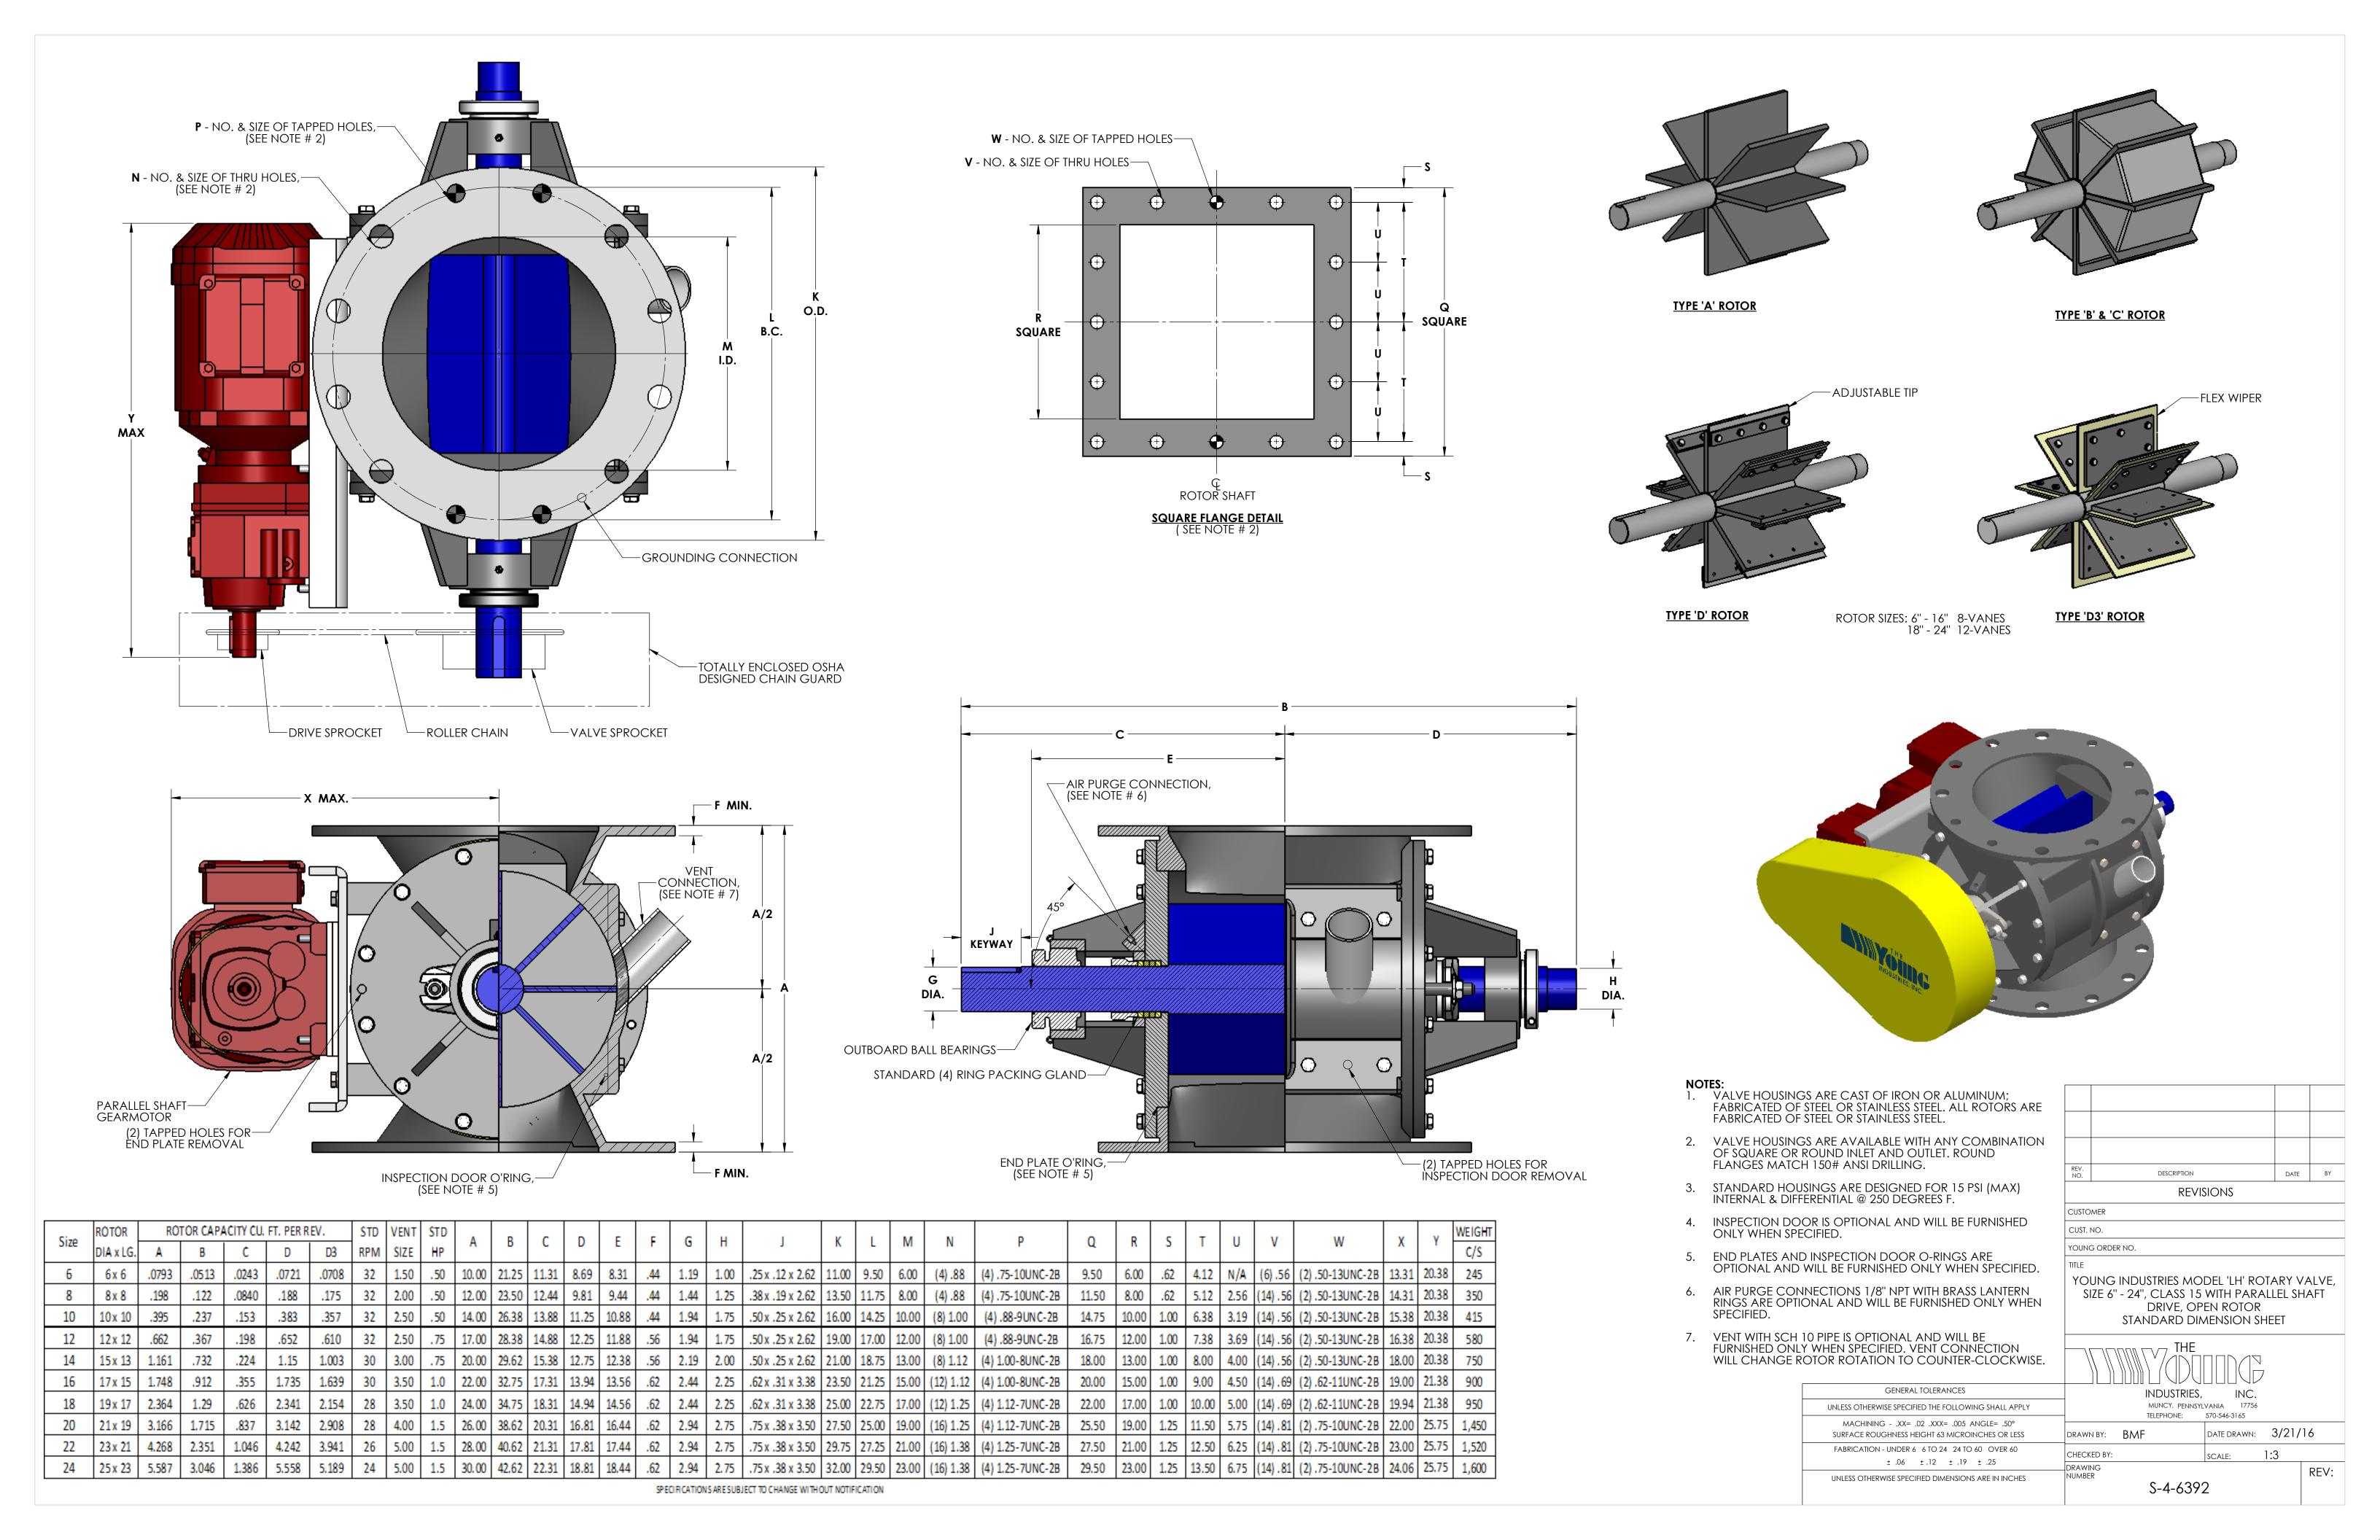

# MODEL LH ROTARY VALVE

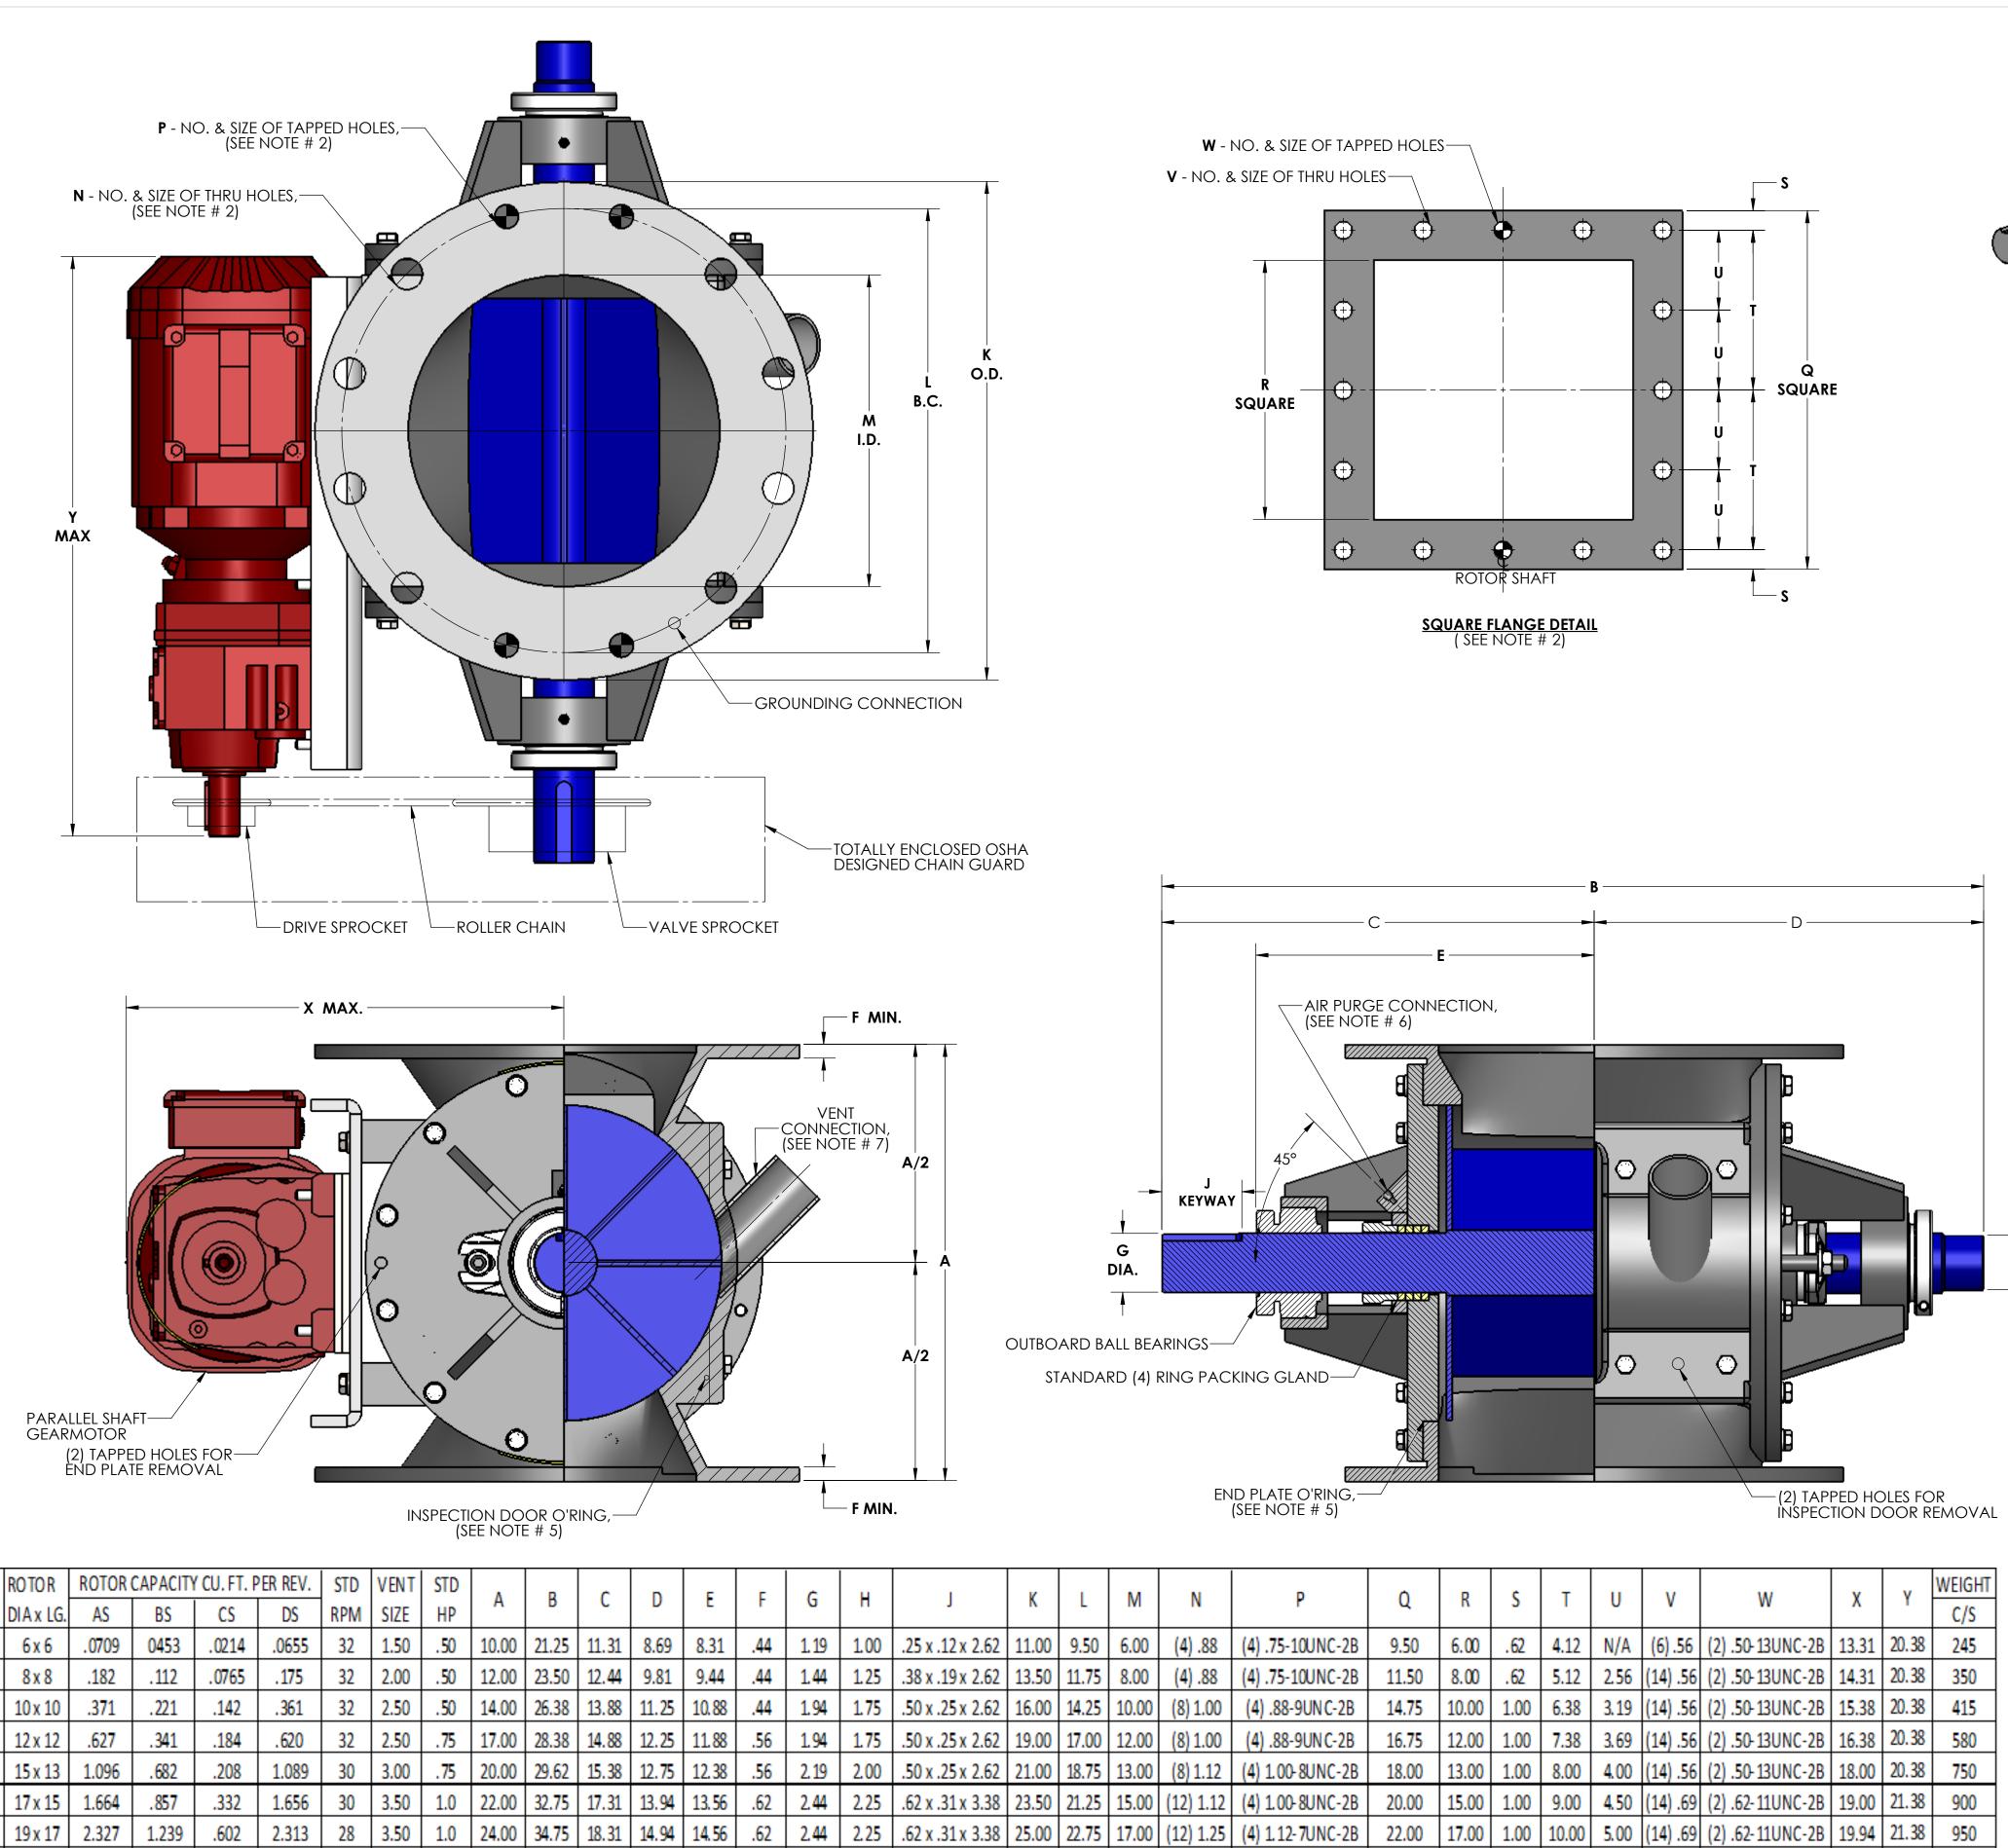

## **OPTIONAL FEATURES:**

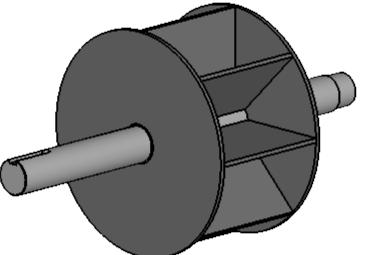

- · High internal pressure designs up to 350 PSIG.
- . High temperature designs up to 1500°F.
- Sizes up to 36" with double length styles available.
- Roller chain drive with parallel shaft TEFC driven gearmotor is standard with explosion proof motors of any specified manufacturer available.
- · Shaft mounted drive is available.
- Special materials of construction including various grades of Stainless Steel, Hastelloy, Titanium, Inconel or Engineered Plastics.
- Interior polish or electro-polish per application requirement.
- · Special packing materials of graphite, food grade PTFE or as needed by process.
- Interior coating for providing abrasion resistance or material release include hard chrome plating, nickel plating, tungsten carbide, Stellite, or Teflon.
- · Lantern ring with purge connection in the packing gland.
- Rotor shaft Mechanical Seals.
- Self-adjusting packing follower.
- · Shaft seal coatings.
- Inlet material deflector/baffle for granular products.
- · Direct venting, with vent installed in the housing.
- · End plate purges.
- Side access/inspection panel for access to the rotor interior.
- · Rotor tips and edges can be beveled.
- · Replaceable rotor tips of flexible or abrasion resistant materials.
- · Exterior painting and coatings to meet customer specifications.

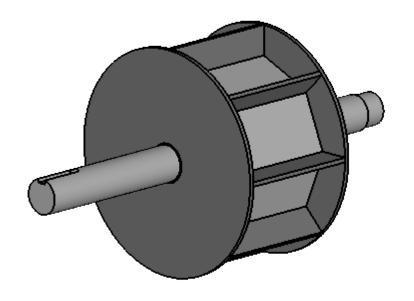

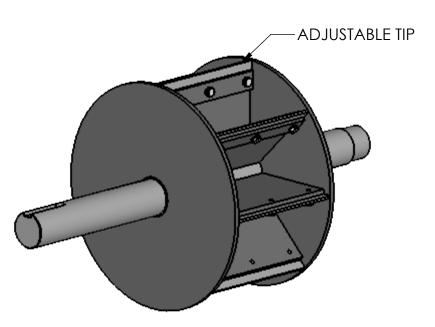

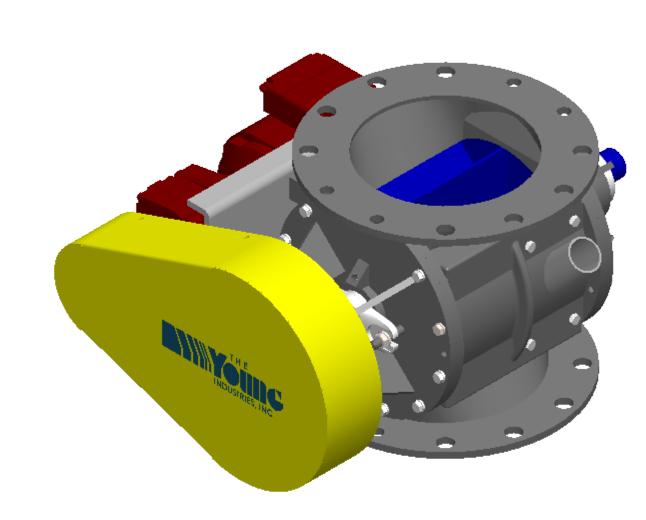

TYPE 'AS' ROTOR

TYPE 'BS' & 'CS' ROTOR

TYPE 'DS' ROTOR

ROTOR SIZES: 6" - 16" 8-VANES 18" - 24" 12-VANES

1. VALVE HOUSINGS ARE CAST OF IRON OR ALUMINUM; FABRICATED OF STEEL OR STAINLESS STEEL. ALL ROTORS ARE FABRICATED OF STEEL OR STAINLESS STEEL.

- VALVE HOUSINGS ARE AVAILABLE WITH ANY COMBINATION OF SQUARE OR ROUND INLET AND OUTLET. ROUND FLANGES MATCH 150# ANSI DRILLING.
- 3. STANDARD HOUSINGS ARE DESIGNED FOR 15 PSI (MAX) INTERNAL & DIFFERENTIAL @ 250 DEGREES F.
- 4. INSPECTION DOOR IS OPTIONAL AND WILL BE FURNISHED ONLY WHEN SPECIFIED.
- 5. END PLATES AND INSPECTION DOOR O-RINGS ARE OPTIONAL AND WILL BE FURNISHED ONLY WHEN SPECIFIED.
- AIR PURGE CONNECTIONS 1/8" NPT WITH BRASS LANTERN RINGS ARE OPTIONAL AND WILL BE FURNISHED ONLY WHEN SPECIFIED.
- 7. VENT WITH SCH 10 PIPE IS OPTIONAL AND WILL BE FURNISHED ONLY WHEN SPECIFIED. VENT CONNECTION WILL CHANGE ROTOR ROTATION TO COUNTER-CLOCKWISE.
