

AERO- MECHANICAL CONVEYOR ROPE ASSEMBLIES

WWW.YOUNGINDS.COM

STANDARD DISC MATERIALS

- ▶ Nylon (Various Grades)
- ▶ Polyurethane
- ▶ Carbon Filled Static Dissipating Polypropylene
- ▶ Metal Detectable Nylon

STANDARD ROPE MATERIALS

- ▶ Galvanized
- ▶ 300 Series Stainless
- ▶ Plastic Coated Rope, Galvanized or Stainless

*Most Rope Assemblies Are Available
To Ship Same Day Or One Day After
Order- Placement*

**ADVANCED
TECHNOLOGY
PROVEN DESIGN**

Aero-Mechanical Rope Assemblies are the heart of any Aero-Mechanical Conveyor System. Young Industries rope assemblies are manufactured in our dedicated rope manufacturing facility located in Muncy PA. We use local suppliers for components to assure we maintain a complete line of stock rope assemblies. We have been manufacturing rope assemblies for over 30 years and have developed special processes to assure that each rope has the same "REPEATABLE QUALITY AND CONSISTENCY". Rope assemblies for size 3" and 4" Aero-Mechanical Conveyors are in stock for immediate shipment.

The process of manufacturing the rope assemblies to precise tolerances has been established and is controlled from start to finish. Our quality control procedures assure that each rope assembly meets our high-quality standards.

SPECIAL ASSEMBLIES:

When an application calls for a disc material of engineered plastic, we can provide the material needed in most cases. We are also able to provide discs of various diameters when the application requires it.

APPLICATION ASSISTANCE:

If you are having a problem with your Aero-Mechanical Conveyor, our Engineers will evaluate your application and come up with the best solution. We will apply the best rope assembly to meet the requirement.
